## EXPERIENCE

### MERN Stack Developer

#### Implies Solution

 June, 2024 - Present  Surat, Gujarat

- **IOTPOT (SaaS Platform)** : Designed and implemented a multi-tenant database system with MQTT protocol integration, enabling scalable IoT device management and real-time data processing.
- **Logistics Management System** : Developed a real-time driver location tracking system using Mapbox , featuring four distinct portals (Admin, User, Driver, Customer ) to streamline logistics operations and enhance user experience.
- **Cachetag (Web Organization Tool)** : Built a platform allowing users to organize web content (YouTube videos, articles, links) and perform deep searches using LLM (Large Language Models), improving data accessibility and collaboration.

### MERN Stack Developer

#### Object Infotech

 Aug, 2022 - May, 2024  Surat, Gujarat

- **GreenFi (Asset Management System)** : Developed a robust platform with three modules—Asset Tracking, Emission, and Questionnaire —supporting multiple roles (Admin, Manager L1/L2, User ) to streamline operations and ensure compliance.
- **Evira (E-Commerce Platform)** : Engineered a variant-based product management system, integrating AWS (EC2, S3, Amplify) for scalable infrastructure, efficient media storage.

## PROJECTS

### PromptMail - Smart Email Automation [GitHub](#)

- Leveraged AI to generate personalized emails tailored to audience in seconds, saving users time & enhancing communication quality.
- Enabled users to manage contacts, launch campaigns, and track engagement metrics (opens, clicks, replies) through an intuitive interface for optimized outreach.
- Allowed users to save drafts, schedule emails, and organize messages into folders/tags, streamlining workflows and boosting productivity.

### Newsline - Full Stack News App

 [GitHub](#)

- Enabled users to customize their news feed by selecting topics, tags, and sources, ensuring relevant and tailored content delivery.
- Facilitated community interaction through comments, likes, and shares, while allowing users to save and organize articles into collections for easy access.

## SKILLS

### Front-end

React • Next.js • Typescript • HTML CSS • JavaScript • Tailwind CSS • Redux • MUI • Shadcn • Remix • Firebase

### Back-end

Node.js • Express • Nest.js • Postgres • MongoDB • MySQL • Redis • GraphQL • RabbitMQ

### Cloud & DevOps

Docker • NGINX • EC2 • Lambda • S3 • RDS • GCP • CI/CD

### Tools

Git • Github • VSCode • Postman • Swagger • ESLint • Prettier • Jira • GitLab • Husky

## EDUCATION

### Bachelor of Computer Applications

Amity University  Noida

## SOFT SKILLS

- Communication
- Documentation Writing
- Topics Explanation
- Technical Mentorship
- Collaboration
- Continuous Learning
